One E-commerce with enquiry on product feature project in WordPress Design some Frontend of website using HTML , CSS , JS , BOOTSTRAP

CERTIFICATIONS

March 2022 - September 2022
WsCube Tech | Jodhpur , Rajasthan

Full Stack Web Developer Trainee
Full-stack web developers undergo comprehensive training in both front-end and back-end technologies. My learning journey involves acquiring proficiency in languages like HTML, CSS, JavaScript, and PHP, as well as database management using MySQLi. Server-side scripting further enhances my skills, ensuring versatility in creating dynamic and robust web applications.

PROJECTS

Responsive Website Development (HTML, CSS , Bootstrap)
Designed and developed a responsive website for a local business, ensuring compatibility across various devices and screen sizes.

Utilized HTML, CSS, and Bootstrap to create an attractive and user-friendly interface. Interactive Web Application (JavaScript, jQuery)
E-commerce Website (PHP, MySQL)
Designed a database system for a fictional e-commerce company, focusing on data normalization and efficient query optimization.
Utilized MySQL to create database tables and relationships.
React Developer (Practice Project)
- Developed a basic React application to enhance understanding of modern front-end development.
- Implemented core React concepts including components, state, props, and lifecycle methods.
- Utilized React Hooks (useState, useEffect) for state management and side effects handling.
- Applied routing using React Router to enable multi-page navigation.
- Incorporated responsive design principles to ensure mobile and desktop compatibility.
- Integrated third-party APIs to fetch and display dynamic data.
- Employed version control with Git for efficient project tracking and collaboration.
- Gained hands-on experience with JavaScript (ES6+), HTML5, and CSS3.
